

Python Ultimate World: Week 5 Plan

Day 26: Asynchronous Programming (asyncio)

 **Documentation Requirement:** For your digital notes, you must document this topic exactly in these four categories: **Definition, Advantage, Disadvantage, Working.**

Task: Write async code to fetch multiple API endpoints concurrently.

Day 27: Web Scraping Basics

 **Documentation Requirement:** For your digital notes, you must document this topic exactly in these four categories: **Definition, Advantage, Disadvantage, Working.**

Task: Extract text data from a simple webpage.

Day 28: Desktop Automation (PyAutoGUI)

 **Documentation Requirement:** For your digital notes, you must document this topic exactly in these four categories: **Definition, Advantage, Disadvantage, Working.**

Task: Write a script to automate basic mouse/keyboard actions.

Day 29: PDF Processing (PyMuPDF)

 **Documentation Requirement:** For your digital notes, you must document this topic exactly in these four categories: **Definition, Advantage, Disadvantage, Working.**

Task: Extract text content from a sample PDF file.

Day 30: Django Framework Basics

Documentation Requirement: For your digital notes, you must document this topic exactly in these four categories: **Definition, Advantage, Disadvantage, Working.**

Task: Setup a basic Django project structure.

Day 31: REST Framework Integration

Documentation Requirement: For your digital notes, you must document this topic exactly in these four categories: **Definition, Advantage, Disadvantage, Working.**

Task: Create a simple API endpoint returning JSON.

Day 32_S: FINAL REVISION

Task: Combine skills to build an AI-free mini-project. Reflect on progress.
