

Python Ultimate World: Week 4 Plan

Day 19: Iterators & Generators

 **Documentation Requirement:** For your digital notes, you must document this topic exactly in these four categories: **Definition, Advantage, Disadvantage, Working.**

Task: Create a custom generator for a large dataset.

Day 20: Decorators

 **Documentation Requirement:** For your digital notes, you must document this topic exactly in these four categories: **Definition, Advantage, Disadvantage, Working.**

Task: Write a decorator to log execution time of functions.

Day 21: Context Managers (with statement)

 **Documentation Requirement:** For your digital notes, you must document this topic exactly in these four categories: **Definition, Advantage, Disadvantage, Working.**

Task: Implement a custom context manager for file operations.

Day 22: Working with APIs (Requests module)

 **Documentation Requirement:** For your digital notes, you must document this topic exactly in these four categories: **Definition, Advantage, Disadvantage, Working.**

Task: Fetch data from a free public API.

Day 23: JSON Data Processing

Documentation Requirement: For your digital notes, you must document this topic exactly in these four categories: **Definition, Advantage, Disadvantage, Working.**

Task: Parse API JSON response and extract specific fields.

Day 24: Database Basics (SQLite3)

Documentation Requirement: For your digital notes, you must document this topic exactly in these four categories: **Definition, Advantage, Disadvantage, Working.**

Task: Connect to SQLite, create a table, and insert API data.

Day 25_S: SUNDAY REVISION

Task: Fetch API data, process JSON, and save to SQLite DB.
